**IN THE CLAIMS:**

This listing of claims will replace all prior versions, and listings, of claims in the application.

1. (Currently Amended) A system of removing carbon dioxide (CO<sub>2</sub>) from a gas stream produced in energy extracting systems comprising;

a CO<sub>2</sub> sorbent bed containing an amine/nitrile CO<sub>2</sub> sorbent, wherein a major portion of the amine portion of said sorbent is formed from secondary amine groups, and at least one functional nitrile group;

a conduit for communicating a source of gas containing CO<sub>2</sub> with said sorbent bed,

a conduit for communicating said sorbent bed with an outlet,

a regeneration device for evolving CO<sub>2</sub> from said CO<sub>2</sub> sorbent bed, and

at least one valve disposed to control a flow of said gas into and out of said sorbent bed, wherein said gas stream is produced by burning of fossil fuels.

2. (Cancelled)

3. (Previously Presented) The system of claim 1, wherein said sorbent includes an amine constituent which is composed of at least 60% secondary amine groups, no more than 10% primary amine groups, and no more than 20% tertiary amine groups.

4. (Previously Presented) The system of claim 1, wherein there are a plurality of functional nitrile groups in said sorbent.

5. (Original) The system of claim 1, wherein said sorbent is a solid weak base ionic exchange resin.

67010-021

6. (Original) The system of claim 1, wherein said sorbent bed includes a plurality of amine sorbent beads, said amine sorbent beads react with said CO<sub>2</sub> to trap said CO<sub>2</sub> within said sorbent bed.

7. (Original) The system of claim 1, including a plurality of said sorbent beds and at least one of said valves operates to switch said flow of gas between said plurality of sorbent beds such that upon saturation of one of said plurality of sorbent beds another non-saturated sorbent bed is placed in communication with said flow of gas.

8. (Original) The system of claim 1, wherein said regenerative device includes a heater to heat said sorbent bed to temperatures sufficient to evolve said CO<sub>2</sub>.

9. (Currently Amended) ~~The system of claim 1, A system of removing carbon dioxide (CO<sub>2</sub>) from a gas stream produced in energy extracting systems comprising:~~

~~a CO<sub>2</sub> sorbent bed containing an amine/nitrile CO<sub>2</sub> sorbent, wherein a major portion of the amine portion of said sorbent is formed from secondary amine groups, and at least one functional nitrile group;~~

~~a conduit for communicating a source of gas containing CO<sub>2</sub> with said sorbent bed,~~

~~a conduit for communicating said sorbent bed with an outlet,~~

~~a regeneration device for evolving CO<sub>2</sub> from said CO<sub>2</sub> sorbent bed, -wherein said regenerative device includes a steam source, said steam source emitting steam into said sorbent bed to drive absorbed CO<sub>2</sub> from said sorbent bed; and~~

~~at least one valve disposed to control a flow of said gas into and out of said sorbent bed.~~

10. (Original) The system of claim 1, wherein said regenerative device includes a vacuum source to draw said evolved CO<sub>2</sub> from said sorbent beds.

11. (Original) The system of claim 1, including a controller to coordinate operation of said regenerative device and said at least one valve.

67010-021

12. (Currently Amended) ~~The system of claim 1.~~ A system of removing carbon dioxide (CO<sub>2</sub>) from a gas produced in energy extracting systems comprising:

a CO<sub>2</sub> sorbent bed containing an amine/nitrile CO<sub>2</sub> sorbent, wherein a major portion of the amine portion of said sorbent is formed from secondary amine groups, and at least one functional nitrile group;

a conduit for communicating a source of gas containing CO<sub>2</sub> with said sorbent bed,

a conduit for communicating said sorbent bed with an outlet,

a regeneration device for evolving CO<sub>2</sub> from said CO<sub>2</sub> sorbent bed, and

at least one valve disposed to control a flow of said gas stream into and out of said sorbent bed, wherein said gas stream emanates from a natural gas well.

13. (Cancelled)

14. (Currently Amended) ~~The system of claim 1;~~ A system of removing carbon dioxide (CO<sub>2</sub>) from a gas stream produced in energy extracting systems comprising:

a CO<sub>2</sub> sorbent bed containing an amine/nitrile CO<sub>2</sub> sorbent, wherein a major portion of the amine portion of said sorbent is formed from secondary amine groups, and at least one functional nitrile group;

a conduit for communicating a source of gas containing CO<sub>2</sub> with said sorbent bed,

a conduit for communicating said sorbent bed with an outlet,

a regeneration device for evolving CO<sub>2</sub> from said CO<sub>2</sub> sorbent bed,

at least one valve disposed to control a flow of said gas into and out of said sorbent bed; and

further including a cooling system operably associated with said sorbent bed to maintain a predetermined temperature within said sorbent bed during absorption of said CO<sub>2</sub>.

67010-021

15. (Currently Amended) The system of claim 1, A system of removing carbon dioxide (CO<sub>2</sub>) from a gas stream produced in energy extracting systems comprising:

a CO<sub>2</sub> sorbent bed containing an amine/nitrile CO<sub>2</sub> sorbent, wherein a major portion of the amine portion of said sorbent is formed from secondary amine groups, and at least one functional nitrile group;

a conduit for communicating a source of gas containing CO<sub>2</sub> with said sorbent bed,

a conduit for communicating said sorbent bed with an outlet,

a regeneration device for evolving CO<sub>2</sub> from said CO<sub>2</sub> sorbent bed;

at least one valve disposed to control a flow of said gas into and out of said sorbent bed; and

further including a storage tank in operable communication with said sorbent bed and controlled by said at least one valve such that CO<sub>2</sub> evolved from said sorbent bed is drawn into said storage tank.

16. (Original) The system of claim 1, further including an exhaust conduit operably associated with said sorbent bed to carry away evolved CO<sub>2</sub>.

67010-021

17. (Currently Amended) A method for removing carbon dioxide (CO<sub>2</sub>) from a gas containing CO<sub>2</sub> extracted from an energy producing system, said method including the steps of:

- a. communicating a at least two CO<sub>2</sub> sorbent bed beds containing an amine/nitrile CO<sub>2</sub> sorbent, wherein a major portion of the amine portion of said sorbent is formed from secondary amine groups, and at least one functional nitrile group with the gas containing CO<sub>2</sub> by placing one of said two sorbent beds within the flow of gas until reaching the predetermined concentration of CO<sub>2</sub>;
- b. absorbing CO<sub>2</sub> contained within the gas with the sorbent bed;
- c. concentrating said CO<sub>2</sub> within said sorbent bed, and
- d. expelling said CO<sub>2</sub> from said sorbent bed upon reaching a predetermined concentration level of CO<sub>2</sub> by applying steam at a temperature above a predetermined temperature to release said CO<sub>2</sub> from said sorbent bed.

18. (Cancelled)

19. (Original) The method of claim 17, further including the step of switching the flow of gas from one of said at least two sorbent beds upon one of said at least two sorbent beds reaches said predetermined concentration of CO<sub>2</sub>.

20. (Currently Amended) The method of ~~claim 18~~ claim 17, wherein said step (d) is further defined by expelling CO<sub>2</sub> from said sorbent bed at the predetermined concentration of CO<sub>2</sub>.

21. (Currently Amended) The method of ~~claim 18~~ claim 17, wherein said step (d) is further defined by raising a temperature of said sorbent bed above a predetermined temperature to release the CO<sub>2</sub> from said sorbent bed.

22. (Cancelled)

67010-021

23. (Currently Amended) The method of ~~claim 18~~ claim 17, wherein said step (d) |  
is further defined by applying a vacuum to draw the expelled CO<sub>2</sub> out of the sorbent bed.

24. (Previously Presented) The method of claim 17, wherein said sorbent bed  
includes a plurality of amine sorbent beads.

25. (Currently Amended) The method of ~~claim 18~~ claim 17, further including |  
switching between said at least two sorbent beds at a predetermined time interval determined  
to optimize concentration of said CO<sub>2</sub> within said sorbent bed.
